

WINTER NOTES

The distinctive features of this season include the sharp contrast between the steel blue sky, the snow-covered ground, and the bare trees.

The colour palette for this season includes contrasting shades like black and white, steel blue, turquoise, and teal, as well as vibrant hues like pinks, cherry red, and deep purples.

This season is focused on cool and clear but strong contrasting colours. It is the only season that looks fabulous in black and white.

*With love,
Nina*
